

Renovation support for the kindergarten in Jalovec:

The kindergarten in Jalovec was renovated at the cost of the village during the years 2008-2009. Among other items the kindergarten installed new wall-to-wall carpets.

The flooding of Handlovka in the summer of 2010 made this carpet unusable and it had to be removed completely.

A lot of work was involved to remove the old carpets, clean the floor and finally to return the kindergarten in the beginning of September to the children and its intended use!

Thanks to the financial help of the Rotary Club Bratislava International, the major of the village was able not only to purchase a new floor, but also to purchase new carpets and finally install them in the rooms of the kindergarten.

Here you can now see the newly renovated environment, no longer reflecting the damages done by the floods:

The Rotary club Bratislava International agreed to donate around 600 Euro in order to cover the costs for the new carpets.
